

BEAUTY AND MUSCLE. Combined in an Exhibition Given by the Young Ladies' Gymnastic Class of the East End.

INDIAN CLUBS AND DUMBBELLS. As Handled in the Exercises Calculated to Add to the Strength and Grace of the Pupils.

FENCING ONE OF THE FINE ARTS SHOWN. The Skilful Flight of a Tambourine Propelled by the Force of a Foot.

Beauty, brain and muscle in the combination that makes the true American girl, and yesterday afternoon the East End Ladies' Gymnastic class gave an exhibition that dissipated all doubt about their right to that name.

The young ladies looked bewitching in their many athletic costumes of black loose blouse waist and short skirt.

Long before the hour for the "grand march" the ladies were rigged out in their uniforms, and, like the "beats out for a holiday," made the best of their opportunity to lay aside their taildike airs and be young again.

Not that any of them are old. Forbid the thought! But in this age and state of the world, the girls are suffering from the ailment of "youth and sedate" at 18.

The Order to Fall In. Forbid the thought! But in this age and state of the world, the girls are suffering from the ailment of "youth and sedate" at 18.

"Beautiful belles and dumb-bells," was one of the features of the programme, and as the grand march passed the rack for the last time, each of the pupils armed herself with a pair of wooden dumb-bells, preparatory to the beautiful little scene.

"Heads erect, arms to the sides" came the order from the instructor, and all were ready. Then to the music of the piano, under the skilful touch of Miss Nellie Dauter, the exercises were gone through with the sound crack of the bells as they came together adding zest to the performance.

A Most Beneficial Exercise. This exercise brings into play nearly all the muscles of the body and arms, and is one of the most helpful in gymnastic work.

Even after the exercises, the young ladies promptly failed to look desparately wicked. They found it impossible to look like black crumblers, but might easily have been seen in the morning.

WHAT PEOPLE ARE DOING. Some Who Travel, Some Who Do Not, and Others Who Talk.

Hobart Brooke, an old Washington correspondent, who is in advance of the United States Mail Company, passed through the city last evening bound for New York to get some new papers.

Thomas A. Flater, a representative of some Holland office men, was at the Schlosser yesterday. He says the fields of Java and Burma have been killed many of the plants.

James Andrews, an old Maine lumberman, passed through the city yesterday for Ohio. He will spend the winter at Zanesville, where he is connected with the Columbus, Shawnee and Hooking Railroad.

Lenny W. Lister, a Brooklyn hunter, reached Pittsburgh yesterday on his way home from Northern Michigan. He had killed 75 squirrels, 112 rabbits, 5 deer and a bear.

John Moorelin, of the Cincinnati brewing firm, is in the city for the week. He came here to see his local agents.

Eben Brewer, of Erie, arrived at the Schlosser last evening to attend the meeting of the Commercial Club.

W. G. Carroll, of Louisville, Superintendent of the Southern Oil Company, is at the Monongahela House.

Judge Thomas Smith, of Warrenton, Va., is returning to that city.

Gilbert H. Baffery, the coke man, went East last evening.

HOLIDAY goods in shape of diamonds, watches, jewelry and musical instruments arrive daily. Largest line of music books.

1200 Penn avenue, 1200.

DIVIDED THE REWARD.

A Washington County Jury Awards the \$1,000 Offered for the Capture of West, Who Murdered the Crouch Family at Beaver.

Chief of Police Murphy and Detective Korman, of the Allegheny police force visited Little Washington yesterday and appeared before the jury that was selected to award the money offered for the capture and conviction of the murderer of the Crouch family. There was a large crowd in attendance, and the proceedings were fraught with considerable interest.

Asking for the day's experience Chief Murphy said last night at the Monongahela City people put in a bid for the entire \$1,000, and were greatly disappointed because they did not get it.

Volney McCreary was \$5 each with Chief Murphy and Detective Korman on this proposition. When Chief Murphy took the stand he told the jury that he did not care if the Allegheny officials did not receive \$1 of the reward. He merely wanted it to go to the people who were entitled to it.

He then told the jury that he had seen the alleged murderer West and the white woman with him from the Pittsburgh morning papers. He said he found the man in the street with those of a colored man and a white woman who he said were the Crouch family.

At the time they told Hoover that they were the Crouch family named Hoover. At the time they told Hoover that they were the Crouch family named Hoover. At the time they told Hoover that they were the Crouch family named Hoover.

After hearing considerable evidence the jury, without much deliberation, divided the money offered for the capture of West in the amount of \$1,000. Orr was the man who worked up the evidence in the case from Pittsburgh.

Chief Murphy says that West is cheerful and hearty and to all appearances is not wasting much time in the jail. He is well liked by the other prisoners and is well liked by the other prisoners and is well liked by the other prisoners.

THOMAS COX BROUGHT BACK. He Quietly Accompanied Captain Brophy, Chief of Police, to the City Jail.

Captain Dick Brophy, of the Second police district, returned yesterday afternoon from Chicago, where he was in charge of the case of Thomas Cox, who is wanted in Pittsburgh for the murder of James McGee.

Brophy stated he found out from Cox that he had gotten on a freight train on Sunday of the trouble and went to Rochester. From there he went to Chicago and stopped at the house of Mrs. McLean, No. 72 South Clark street.

CUTTING CITY TAXES.

Controller Morrow Assures a Reduction of at Least One Mill.

A POSSIBILITY OF A 13-MILL TAX. Mayor Gorley Expected to Produce His Own Appropriation Bill.

NO DANGER OF A DEFICIT THIS YEAR. In view of the expected continued stringency in the money market during the coming year, it is anticipated that the city tax for 1921 will be reduced at least 1 mill from the present rate.

There is a possibility that the tax will be cut down as much as 2 1/2 mills. Of course so many extensive improvements will not be made during the coming year as during the past year.

Controller Morrow has for some time been working out the plan whereby the present city tax of 15 mills will be reduced, but so far he has kept most of the details of his plans to himself. He, however, is authority for the statement that the tax will be reduced at least one mill. While he thinks the reduction might be as much as 2 1/2 mills, he was not positive.

BOUND TO BE A REDUCTION. "You can rest assured," Mr. Morrow said, "there will be a reduction, and it won't be less than a mill. It ought to be three mills."

PHILIPS NOT ENTIRELY DISCONNECTED WITH Mr. Malone's Removal. Although Mr. Malone's removal from the Pittsburgh Supervisors' office is a subject of much interest to the public, the fact that the period, the gossip concerning it has not been out of any means.

TOYING WITH THE ALLIANCE.

Congressman Wilson Says the Farmers Will Be a Political Factor in the Future—Governor Campbell Doesn't Believe the Senate Will Pass the Evans Bill.

The trial from the West last evening brought in Governor Campbell and wife, of Ohio, and Congressman Wilson, Wade and Torrey, of Missouri. The Representatives were bound for Washington, and the Governor was leaving for his home.

Governor Campbell doesn't believe the Senate will pass the Evans bill. He was pleased with the result of the election in 1912. He rather inclined to believe that the Farmers' Alliance party candidate in the field, and in this case both parties will have to look to their interests.

Both Wade and Wilson are officers in the Farmers' Alliance, and have endorsed the Evans bill. They will stick to their present platform if they stay with the Farmers' Alliance.

LIMA LAMP FOR FUEL.

J. Painter and Sons Company Testing a New Process for Puddling.

TO REPLACE COAL AND GAS. Mr. Arrington's Scheme Gets a Black Eye in Philadelphia.

BIG ORDERS FOR ANTHRACITE COAL. It is quite probable that the failure of the gas supply will not prove such an inconvenience to the manufacturers as was at first expected, and if the experiment now being made by the J. Painter & Sons Company, in the use of the Lima oil, is successful, many will go back to coal, after all.

This firm began puddling yesterday morning by the use of Lima oil and compressed air, and according to the statements of representatives of the firm the results were entirely satisfactory. The only matter to be settled is the item of expense, and it is expected to decide that during the present week.

The process adopted is a patented system controlled by the Gilbert & Barker Manufacturing Company, of Boston. Their representative, Mr. H. T. Sanborn, had charge of the experiments yesterday, and a DISPATCH reporter explained the manner in which it is operated.

The apparatus consists of a tank, with a capacity of 10 to 15 barrels; an air tank and pipes leading from the furnace. Both tanks are put under a 15-pound pressure of compressed air, and thus the oil is forced into the furnace. An intense heat is made, and it is said better time can be made than with either coal or gas.

Eight heaters were turned out yesterday and today. The results were very good. Both tanks are put under a 15-pound pressure of compressed air, and thus the oil is forced into the furnace. An intense heat is made, and it is said better time can be made than with either coal or gas.
